

Project: ECMTA and earsense: a collaborative chamber music community

Dear members of ECMTA,

We are happy to present the **earsense.org/ECMTA online platform!**

The online platform <https://www.earsense.org/ecmta/> was created **especially for the ECMTA members**, within the *www.earsense.org* online chamber music exploratorium. The chamber music exploratorium *earsense.org* enables every music lover to search the database according to various criteria. Thanks to the cooperation project between ECMTA and earsense.org founder Kai Christiansen, **all individual members and representatives of the institutional members of the ECMTA can now login to this online platform** <https://www.earsense.org/ecmta/> and use it for sharing their knowledge with other members.

By logging in as an ECMTA member you can use the database **AND**

- **add new chamber music works to the earsense.org database** that are
 - a) not there
 - 2) unknown /forgotten
 - 3) new
- **update existing works/composers with new information** as necessary. Please feel free to add comments about available scores, best recordings, performance tips etc.
- In addition to chamber music works database, take a look at ECMTA recommended list of **further reading** on the ECMTA/earsense page that features papers, books and articles on chamber music and pedagogy. <https://www.earsense.org/ecmta/>

Note: This platform is available only for the members of the ECMTA. Login information and detailed instructions will be sent to the members by email. For further information, please check the introduction video by Kai Christiansen: <https://www.youtube.com/watch?v=7cOkQtMdIz0>

The video presentation was created for the ECMTA conference in Lisbon, April 2019.

For questions, please contact: info@ecmta.eu (secretary of the ECMTA) or the **earsense.org/ECMTA team**:
